Description

Our Soflex® Cloud Cushion is made from a hyper-elastic rubber material that dramatically reduces the pressure on your lower pelvis and the bones that bear most of your weight when sitting down. The cushion instantly adapts as you move around, which prevents your tail bone from curving downwards and causing long-term discomfort (or coccydynia). This cushion is ideal in a wide variety of settings including wheel chairs, car seats, office chairs and more.

Components

Top Layer:

- Thermoplastic Elastomer with Diamond Cut Grid

Bottom Layer:

- Thermoplastic Elastomer with Diamond Cross Cut Grid

Cover:

- 100% Polyester & Anti-Slip Grips
